Subject: Suitability with CO₂

About Suitability to Work with CO₂

Dear Valued Customer,

Thank you for choosing our product.

We have received an email as to whether the products are suitable for use with carbon dioxide. Therefore, we deem it necessary to provide this information to you.

Based on our experience and literature knowledge, products can be used with **carbon dioxide** as “dry” at room temperature (~25 °C). As we state that the negative effect on our products will increase as the water in carbon dioxide increases, we would like to emphasize the importance that our pin-pricked products should be preferred for these applications.

Any further questions please do not hesitate to contact us.

Best regards,

Semih ŞAŞMAZ
